Inflation Gun, Chuck and Gauge

The appliance has combined the function of an inflation gun, chuck and gauge into one smoothly operating gadget. This is literally three **tools** in a compact design. Bulky tools are an inconvenience during operation.

The gauge is easy to read from and it has pressure readout of 10-150 PSI. With this, monitoring tire pressure is easy. Using the tool is fast and simple. The chuck is placed on the tire stem, the trigger is pulled and then the gauge will be indicating the pressure achieved.

If the chuck is withdrawn from the tire stem, the gauge will record the pressure of the tire that was being inflated. This is useful in ensuring that the right pressure has been achieved in all the tires as desired.

The design used in attaching the chuck to the tire stem is extremely handy. It uses a quick clip-on mechanism that does not cause extreme strain in connecting. It can be used without holding it on with hands.

With correct positioning, inflation only requires pulling the lever for the tires to be filled. Records of pressure of the components being inflated will be kept in the gauge and can be erased with a simple reset. Keeping the pressure rating is important in monitoring the condition of the tires. [More details...](#)

Built-in Relief Valve

This feature has been added for safety purposes. Pressure could build-up in the tires and become detrimental to the quality of the tires. The built-in relief valve is present to reduce this pressure from the tires in case it is accidentally inflated beyond the optimum capacity that it has been designed for. This feature increases the life span of the tires.

Flexibility of Use

The **Campbell Hausfeld MP6000 Tire Inflator with Gauge** comes with a hose to enhance flexibility during inflation tasks. It allows easier maneuverability of the appliance to ensure that the chuck fits into the tire stem properly. The small and compact nature of this inflation tool also increases ease of use.

Pros of the MP6000 Tire Inflator

- It has a sturdy lower body design that is made of metal. This makes it very durable.
- The gauge has pressure readout of 10-150 PSI and is able to store pressure of inflated items.
- It is available in a range of colors.
- It has a flexible hose to facilitate movement.
- It has a one year warranty certificate.
